

C4-111 Carpet Nosing

C4-111 Carpet Nosing

The C4-111 Carpet Nosing is designed to create a highly visible step edge to reduce slips and falls and enhance speed in all egress situations whether light, dark or dimly lit.

The 37.3mm photoluminescent insert of hard wearing slip resistant silicon carbide is visible for many hours after the lights go out, having been charged from sunlight or artificial light.

The aluminium carpet nosing is fitted onto the edge of the carpeted steps to create an aesthetically pleasing edge.
