

C5-111 Carpet Nosing

C5-111 Carpet Nosing

The C5-111 Carpet Nosing is designed to create a highly visible step edge to reduce slips and falls and enhance speed in all egress situations whether light, dark or dimly lit.

The 37.3mm photoluminescent insert of hard wearing slip resistant silicon carbide is visible for many hours after the lights go out, having been charged by sunlight or artificial light.

The aluminium step nosing is fitted onto the edge of carpeted steps to create an aesthetically pleasing edge.
