

F13-111 NCC Code Compliant Flat Nosing

F13-111 NCC Code Compliant Step Nosing

The **F13-111 NCC Code Compliant Step Nosing** is designed to create a highly visible step edge to reduce slips and falls and enhance speed in all situations whether light, dark or dimly lit.

The flat aluminium step nosing is fitted onto the edge of the step to create an aesthetically pleasing edge.

The 51mm photoluminescent insert of hard wearing slip resistant silicon carbide is visible for many hours after the lights go out, having been charged from sunlight or artificial light.

The **F13-111 NCC Code Compliant Step Nosing** can be used on a range of substrates such as concrete, timber, tiles, vinyl, steel and checker plate. Installation is a simple process using fixers (supplied) and glue.

The **F13-111 NCC Code Compliant Step Nosing** can also be fitted over steps with an industrial or commercial type carpet (with no underlay) and up to 6mm thick.
