

# F5-101 Flat Nosing

## F5-101 Step Nosing

The F5-101 is an aluminium stair nosing for fitting to the edge of steps to reduce slips and falls and enhance speed of movement in all weather conditions.

The lower riser than the F4-171 and the 5mm radius curved edge meets particular international code requirements.

The 15.5mm photoluminescent strip is visible for many hours after the lights go out, having been charged from sunlight or artificial light.

The aluminium ridges provide all weather protection from slips and falls. The F5-101 can also be fitted over steps with an industrial or commercial type carpet (with no underlay) and up to 6mm thick.
