

# T5-111 Threshold Strip

## T5-111 Threshold Strip

The T5-111 is designed to clearly define the step edge and reduce slips and falls in all egress situations.

The T5-111 can be easily glued into place. It can also be mechanically fixed by drilling through the non-slip area as suited to the location.

The 51mm photoluminescent strip is visible for many hours after the lights go out, having been charged from sunlight or artificial light.
